Glory Insight — May 2026 Monthly Brief

Executive Summary

May 2026 was characterized by continued market consolidation for Glory Cat (GCAT), with trading activity remaining relatively stable despite broader weakness across the cryptocurrency market.

The primary focus during the month was ecosystem development. Glory Labs expanded its development team and continued planning efforts for both Glory Market and Glory Meter. In addition, the Glory Market Community Design Challenge was launched to encourage community participation in future product development.

Community growth remained positive, total token burns exceeded 5.5 billion GCAT, and holder count continued its gradual upward trend.

Market Overview

Price: ~\$0.00000065

Market Cap: ~\$69,000

Liquidity: ~\$34,000

Holders: ~1,070

Volume: ~\$1,000

Glory Intelligence

Market Status

GCAT remained in a consolidation phase throughout May, with buying activity generally offset by selling pressure. Broader cryptocurrency market weakness also contributed to limited price movement during the latter portion of the month.

Key Observations

- Trading activity remained relatively consistent throughout the month.
- Daily transaction counts generally ranged between 20 and 30 transactions.
- Liquidity levels remained stable compared to April.
- Holder count continued to trend upward despite market-wide bearish sentiment.
- Token burns continued to reduce overall supply.

Short-Term Outlook

Future ecosystem development remains one of the most important drivers of long-term growth. Continued progress on platform development, combined with improved market conditions, could provide positive momentum moving forward.

Ecosystem Development

Development efforts during May centered primarily on two ecosystem initiatives:

Glory Market

Planning and development activities continued for Glory Market, the future e-commerce platform of the Glory Universe ecosystem. During the month, Glory Labs expanded its development capabilities through the addition of a dedicated UI/UX designer, frontend developer, and backend developer.

Glory Meter

Planning and requirements development also continued for Glory Meter, the ecosystem's wallet intelligence and reputation platform.

Community Design Challenge

The Glory Market Community Design Challenge was officially launched during May. The initiative invites community members to submit original product concepts for potential inclusion within Glory Market while competing for cash prizes and community recognition.

Submissions remain open through mid-June 2026.

Growth & Adoption

Holder growth remained positive throughout May, with approximately 30–40 new holders added during the month.

The project also recorded approximately 25 new followers on X. Although community engagement levels across X and Telegram remain below long-term objectives, both holder growth and community expansion continued during the reporting period, indicating ongoing interest in the Glory Universe ecosystem.

May Milestones

- Total token burns surpassed 5.5 billion GCAT.
- Development team expanded with dedicated UI/UX, frontend, and backend resources.
- Glory Market and Glory Meter planning efforts advanced.
- Glory Market Community Design Challenge launched.

- Holder count surpassed 1,070 wallets.
-

Forward Outlook

Focus for June 2026 will center on:

- Advancing development of Glory Market.
 - Advancing development of Glory Meter.
 - Continued execution of the Glory Market Community Design Challenge.
 - Evaluating community submissions and preparing for finalist selection.
 - Expanding ecosystem development initiatives.
-

Closing

Glory Insight remains committed to providing transparent reporting on the progress of the Glory Universe ecosystem.

We thank the community for its continued support and participation as development efforts move forward.
